

Press Release
Calvià, 18th April 2020

Calvià creates 10 new routes for cleaning and disinfecting the most sensitive points in the municipality due to Covid-19

The municipal company Calvià 2000 has intensified the disinfection and cleaning of the most frequented and sensitive places in the municipality since the state of alarm began.

Thus, in addition to the usual cleaning that is carried out throughout the municipality, 8 special cleaning routes have been created that are carried out seven days a week, and 2 special cleaning routes with a frequency of five days a week, reaching a special cleaning and disinfection of all the points that are considered most sensitive, in these circumstances, of the entire municipal area, such as exteriors of health centres, supermarkets, chemists, etc. These tasks also involve cleaning and disinfecting containers and rubbish bins.

To carry out these cleaning works, a reorganisation of the personnel has been carried out, which has meant adding nine more teams to these cleaning brigades.
